Rotating Storage and Filing Systems

Eurot[®]

Eurot is a filing system with rotary shelves for the storage of documents; it is the ideal solution to operate, in limited spaces and in ergonomics, when a quick file consultation is required.

The main feature of Eurot consists in providing the operator with the document requested, in the consultation area. The rotary shelves always follow the shortest path to reach the operator.

Space optimization
Ergonomics
Elegance

The possibility to arrange the shelves is large and complete for the most varied requirements.

Extractable drawers for hanging folders with frontal visibility

Shelves for hanging folders with side visibility

Shelves with boxes for cards

Shelves with fixed dividers for flat files/boxfiles

EUROT

Vertimag®

Vertimag is an automated storage system consisting of two sides of racks where metal containers, served by a lift device, are located. It is the ideal solution for handling materials of every size, weight and dimensions.

Vertimag has a considerable vertical extension and is designed to have more than one workstation on the same machine

Innovative
Economic
Versatile

The knowledge of users' needs makes it possible to propose the right solutions.

Vertimag - 250 kg
Vertimag - 500 kg
Vertimag - 750 kg

Detail of the monitor on the articulated arm

Version with the second drawer in standby for an increased performance

Integration with anthropomorphic robot

Compartmenting tray with boxes
