Certified Quality

Ferretto Group Spa is a company that operates at the cutting-edge in terms of quality management system, production and design of its structures, care for the environment during manufacturing, and safety in the workplace.

It is in fact one of the few companies in Italy to make products in compliance with the CISI procedures, featuring even stricter requirements than the FEM standards, the reference for the sector in Europe.

Other proofs of the company's quality-oriented philosophy are the certifications EN ISO 3834-2 for its welding processes, the more general and universally recognized UNI EN ISO 9001 for the entire quality system, and the ISO 14001 as far as concerns the environmental regulation, all carefully proven by Det Norske Veritas.
